

Arbortext IsoDraw System Requirements

Certain requirements must be satisfied if you wish to use Arbortext IsoDraw Foundation or Arbortext IsoDraw CADprocess on a PC. We have also made a number of recommendations which can help speed up work with the program considerably.

System requirements for Arbortext IsoDraw Foundation

<u>Requirement</u>	<u>Description</u>
IBM-compatible PC with powerful processor:	Min. clock speed 1 GHz
RAM:	256 MB or more
Free space on hard disk:	50 MB
Graphics card:	Supports 16-bit color resolution (High Color); screen resolution of 800x600 pixels or more.
Required operating system:	Windows® 2000, XP
Keyboard:	With function keys and mouse

Please make sure that, when using a PostScript™ printer, the printer driver supports PostScript™. This will speed up the printing process considerably.

System requirements for Arbortext IsoDraw CADprocess

More RAM is required to process 3D data. The time taken to perform these processing operations depends on the amount of RAM available and the clock speed of the processor. The actual resources required depend on the complexity of your data.

The recommended system requirements are therefore as follows:

<u>Requirement</u>	<u>Description</u>
IBM-compatible PC with powerful processor:	Min. clock speed 2 GHz
RAM:	1 GB or more
Free space on hard disk:	200 MB
Graphics card:	Supports 16-bit color resolution (High Color); screen resolution of 800x600 pixels or more.
Required operating system:	Windows® 2000, XP
Keyboard:	With function keys and mouse

Please make sure that, when using a PostScript™ printer, the printer driver supports PostScript™. This will speed up the printing process considerably.
