What type of Mathcad license should you buy?

Enterprise License (Node Locked or Floating w/Maintenance)

- “Best” possible solution for a company to purchase
 - ✓ Licensed to Corporation – includes Gold Support & Software Upgrades
 - ✓ Fully Transferable License (Users and Machine)

WHAT NOT TO BUY!

Single User License or Educational License (Licensed to Individual User – Not Company)

- “Poor” option for most customers (INDIVIDUAL is owner of record)
 - ✓ No Support, No Software Upgrades and No Re-issue of Licenses
 - ✓ Many customers are unaware of single user restrictions:
 - ❖ Licensed to Individual User → Non-transferable between Person/Machine
 - ❖ License cannot be transferred or re-issued in the event a system failure renders license unusable or individuals change or leave department/company.
