ZwCAD 2008i - USB key

ZwCAD software licenses are tracked through the use of a USB key. The software can be loaded on as many PCs as you wish. The current user must have the USB key attached to his/her PC to run ZwCAD in its fully functional mode. This allows you to run the software on your home or office PC, or to 'float' the license among different users in your office. When you include Ad-Tech's Support Plan with your purchase you ensure access to professional answers to any questions you may have, provided by a US based company.
