## Pro/ENGINEER Advanced Assembly Extension

### Advanced assembly management

Innovative product design often involves creating and managing an array of components and sub-assemblies. Pro/ENGINEER Advanced Assembly enhances the productivity of distributed teams with capabilities for design criteria management, top-down assembly design, and assembly process planning. Benefits include: more flexible designs, improved technical documentation, and accurate fabrication instructions.

### Capabilities & Benefits:

- Design complex products using powerful tools to support any top-down design process
- Create alternate product variations programmatically, allowing fast mass product customization
- Create layouts for documenting and driving the configuration of models, using critical engineering data
- Create assembly drawings and process plans for detailed fabrication instructions, repair and service manuals
- Complete, fully digital representation of product, regardless of size or complexity
