CAE Extensions

Pro/ENGINEER makes it simple to test and optimize products for structural, thermal, and dynamic performance throughout design and product development by using simple, yet powerful simulation tools to predict and accommodate real-world conditions. From critical shapes, styling and dimensions to stress and fatigue analysis, Pro/ENGINEER offers comprehensive engineering solutions that provide an added advantage when working with rigorous demands.

Pro/ENGINEER

With full CAD/CAM/CAE capabilities, Pro/ENGINEER is the world's most commercially adopted 3D product design solution.

Pro/ENGINEER Advanced Mechanica

Understand product performance early in the development cycle.

Pro/ENGINEER Behavioral Modeling

Embed real-world design requirements within the digital model to perpetually satisfy design criteria.

Pro/ENGINEER Mechanism Dynamics

Virtually simulate reactions to accelerations & the weight of moving components.

Pro/ENGINEER Mechanica

Simultaneously design & simulate results of design variations.

Pro/ENGINEER Fatigue Advisor

Predict & improve the fatigue performance of designs.
