CAM Extensions

Pro/ENGINEER offers Computer Aided Manufacturing (CAM) software solutions that increase productivity through specialized, automated applications that reduce the time it takes from bringing a digital product to production.

Pro/ENGINEER

With full CAD/CAM/CAE capabilities, Pro/ENGINEER is the world's most commercially adopted 3D product design solution.

Pro/ENGINEER Complete Machining

A full solution for creating all types of programs for CNC machines used in production environments.

Pro/ENGINEER Prismatic and Multi-surface Milling

Increase NC productivity with this virtual milling specialist for prismatic machining.

Pro/ENGINEER Production Machining

Provides robust NC programming capabilities for production machining applications.

Pro/TOOLMAKER

Pro/TOOLMAKER offers the power of high-speed machining for toolmaking, prototypes, and other precision machining applications, with a fast, easy-to-use, NC toolpath programming application.

Pro/ENGINEER Computer-Aided Verification

Allows digital inspections of machined parts & assemblies for quality assurance.

Pro/ENGINEER Tool Design

A guided process-driven workflow for creation of single & multiple-cavity molds.

Pro/ENGINEER Progressive Die

Automatically create documentation, clearance cuts & drilled holes.

Pro/ENGINEER Expert Moldbase

Simple, process-driven workflow creates automated moldbase design & detailing.

Pro/ENGINEER Complete Mold Design

Core, cavity & moldbase design capabilities – all in one package.

Pro/ENGINEER NC Sheetmetal

Automatically create & optimize toolpaths using standard & form tools.

Pro/ENGINEER Plastic Advisor

Simulates plastic-filling process for injection-molded parts.
