## Pro/ENGINEER Complete Mold Design Extension

### Total mold design

Professional mold designers now have everything they need to completely design an entire mold assembly – core, cavity and moldbase – in one package. Pro/ENGINEER Complete Mold Design combines all the features of Tool Design (TDO) and Expert Moldbase (EMX), offering a powerful combination of capabilities for specialized mold assembly creation.

### Capabilities & Benefits:

- Automates the creation of mold core, cavity, moldbase assemblies, and applicable documentation
- Simple, process oriented workflow results in dramatically faster tool design time
- Eliminates data translation between part design, mold design and NC tool path creation
- Reduces need for redesigns through automatic updating of tooling models, drawings and electrodes
- Eliminates costly rework via interference checking and mold opening simulation
