Pro/ENGINEER Interactive Surface Design Extension (ISDX)

Form and function brought together

With the freeform surfacing capabilities of Pro/ENGINEER Interactive Surface Design, designers and engineers can quickly and easily create highly precise and distinctly aesthetic product designs. The result: design according to your requirements, not to your software's limitations.

Capabilities & Benefits:

- Combined freeform and technical surfacing means no data transfer between design and engineering
- Design precise surfaces to achieve highly-engineered, manufacturable products
- Confidently explore design variants by making fully associative changes at any time
- Intuitive user interface provides maximum feedback and allows rapid and extreme product design
- Create products that look better, sell better, and get to market faster
