Pro/ENGINEER Interface for Unigraphics with ATB

Associative data exchange

Industry-wide, the necessity of dealing with heterogeneous CAD data is a reality. Pro/ENGINEER Interface for UG with ATB makes that reality a bit easier. It connects to a live session of UG to pass geometry back and forth with Pro/ENGINEER while retaining associativity. So, changes made in UG drive updates within Pro/ENGINEER, allowing more efficient multi-CAD design.

Capabilities & Benefits:

- Natively reads UG version 18 and UG NX data
- Writes either UG 18 or UG NX data, depending on version to which user is connected
- Supports bi-directional exchange of both parts and assemblies
- Supports exchange of construction curves and body color information
