Arbortext IsoView

Organizations increasingly rely on the Internet to communicate technical information to a wide variety of audiences. Most often, the posted documents are static, with equally static illustrations. However, technical publications become much more valuable-and much more readable- when users can interact with the graphical content. There is an increasing need to provide illustration tools that enable readers to zoom, rotate, or otherwise manipulate the illustrated content. Arbortext IsoView gives you that capability.

Arbortext IsoView, a key component of the PTC Arbortext product family of dynamic publishing software, is the industry's leading intelligent technical graphics viewer. Arbortext IsoView enables readers to view and interact with technical illustrations.

Capabilities and Benefits

- Provides high-quality display of technical graphics in an interactive electronic environment like electronic parts catalogs, IETMs, etc.
- The industry standard viewer for CGM files (CGM Version1-4, WebCGM)
- Compliant with ASD S1000D and ATA iSpec 2200 standards
- Display and print all major raster formats (TIFF, JPEG, PNG, BMP, PCX and CALS Raster)
- Embed hotspots in graphics to improve readability and user experience
- Enables readers to interact with published graphics (zoom, pan, etc.)
- Readers can add comments to graphics and export the information into the documentation workflow (redlining)
- Displays both vector and raster from hybrid archives
- Available as an ActiveX Control for use within Internet Explorer, Visual Basic applications, and other compliant environments
- Integrates with existing enterprise systems and applications
