## Pro/ENGINEER NC Sheetmetal

### Punch and bend metal

Inefficient sheetmetal manufacturing entails high levels of scrap, and manually-conducted repetitive operations. Eliminating these problems is the domain of Pro/ENGINEER NC Sheetmetal. You gain productivity by automatically creating and optimizing toolpaths using standard and form tools. And, with its smart auto-nesting, you utilize maximum sheet area, reduce scrap and material costs and shorten lead times.

### Capabilities & Benefits:

- NC programming for turret punch presses, contouring laser/flame machines, nibbling and shearing
- Automatic tool selection (standard and custom forms) for punching, forming, and nibbling
- Full postprocessor generation capabilities to integrate seamlessly with all CNC machine tools
- Able to machine imported 2D/3D models as well as native Pro/ENGINEER sheetmetal designs
- Reduces scrap via intelligent nesting, decreasing product cost
