PTC Pro/FICIENCY

PTC Pro/FICIENCY is a Web-based, MCAD skills assessment and development-planning tool that will help improve the skills and productivity of your software users. It provides a user-friendly experience and generates useful reports regarding one's abilities.

As a skills assessment, Pro/FICIENCY offers three types of assessments:

Candidate Screening Assessments

Tools to help you in hiring potential candidates.

Course CheckPoints

An exercise to determine knowledge strengths, skills and improvement areas based on a specific course. It helps users understand whether they have mastered the material covered in a given course before moving to the next course in the string.

Benchmarking Assessments

Assess the profile of the capabilities of a given user or organization. Users and managers can jointly develop a process based on the strengths and weaknesses identified in the evaluation.
