Pro/ENGINEER Reverse Engineering Extension

Capture existing designs

Pro/ENGINEER Reverse Engineering allows the transformation of existing physical products into digital models. Its suite of automation capabilities and ability to impose dramatic design changes help improve product customization and increase design re-use opportunities. Fast and powerful, Pro/ENGINEER Reverse Engineering enables productive use of existing intellectual property.

Capabilities & Benefits:

- Refine point clouds and quickly fill in gaps
- Create precise surfaces automatically from scanned point cloud data
- Work with flexible facet modeling tools and the ability to impose limitless design modifications
- Increase your organization's accessibility to discontinued or hard-to-find designs
- Increase market responsiveness by efficiently allowing mass customization from a single design
