Pro/ENGINEER Routed Systems Designer Extension

Capture logic

Design engineers often face the frustrating task of interpreting hardcopy 2D schematics to route 3D cables and pipes. Pro/ENGINEER Routed Systems Designer offers a remedy. This complete solution for documenting both electrical and mechanical systems also automates the transfer of data to Pro/ENGINEER for 3D cabling/piping design. This elimination of data misinterpretation ensures logical compliance with the schematic.

Capabilities & Benefits:

Create schematic designs quickly and easily, enabling complete system documentation regardless of complexity

Multi-disciplinary, includes capabilities for: ladder, wiring, piping, and hydraulic schematics

Optimized to drive 3D cabling and piping routing within Pro/ENGINEER

Multi-user capability enables greater efficiency through concurrent design

Complete suite of diagramming tools encourages design reuse and automation

3D Routing Applications

Optimized to drive Pro/ENGINEER 3D routing applications with tested methodologies.

Schematic Solution

Standalone multi-disciplined schematic solution, linked to 3D routing via XML.
