## Windchill

### Production-proven content and process management software

Whether you're a global conglomerate, a regional supplier, or a small service bureau, you face obstacles while trying to manage product content and development processes. Your company's success relies on having efficient business processes and effective development of complex information assets including product designs, service documentation, and regulatory submissions. Windchill, PTC's production-proven content and process management software, offers a solution. Fast, secure, and requiring only a Web browser to access, Windchill enables companies to streamline product development processes and deliver superior physical goods and information products.

#### Benefits

- Single source of product information/content enables development efficiencies, reduces errors and rework
- Complete product definition and collaboration capabilities expertly drive cross-enterprise understanding of information - regardless of source
- Repeatable, end-to-end process support and automation speeds time-to-market and reduces development cost
- Secure, industry-standard Internet architecture delivers a safe, high-performing technology platform

#### [What's New in Windchill 9.0](#)

#### **Key component of PTC's Product Development System**

Integral connection with Pro/ENGINEER, Arbortext and ProductView

#### **Interoperable**

End-to-end process support to other enterprise systems

#### **Strengthens business processes**

Supports complete, real-world business processes such as design outsourcing, manufacturing process management, change and configuration management, component and supplier management and coordinating technical publications from start to finish.

#### **Heterogeneous Data**

With a deep understanding of electrical/mechanical design data, software, technical documentation and related content from the major authoring tools, Windchill can manage and allow collaboration on heterogeneous product content.

#### **Designed for distributed product development**

The pure Internet architecture of Windchill enables world-wide access, an integral user experience and interoperability with other enterprise technologies.

#### **Powerful Configuration and Change Management**

Manage the evolution of configurations over time using out-of-the-box, best practice lifecycle and change management templates that can be modified and reused.

#### **Integral Manufacturing Process Management with Windchill MPMLink**

Ensure that manufacturing instructions accurately reflect the current engineering design and modeling decisions take into account manufacturing best practices.

#### **Windchill Archive Module**

Enables administrators to easily archive and restore product information, providing data security and reducing compliance costs to meet regulatory information storage requirements.

---

## Windchill

Windchill manages content and product data while streamlining processes to help companies deliver superior products.

### Windchill Workgroup Manager for AutoCAD

Combines the power of Windchill collaboration & control with AutoCAD.

### Windchill Workgroup Manager for Autodesk Inventor

Combines the power of Windchill collaboration & control with Inventor.

### Windchill Workgroup Manager for CATIA V4

Combines the power of Windchill collaboration & control with CATIA V4.

### Windchill Workgroup Manager for CATIA V5

Combines the power of Windchill collaboration & control with CATIA V5.

### Windchill Workgroup Manager for ECAD

Combines the power of Windchill collaboration & control with ECAD design solutions.

### Windchill Workgroup Manager for SolidWorks

Combines the power of Windchill collaboration & control with SolidWorks.

### Windchill Workgroup Manager for UGS NX

Combines the power of Windchill collaboration & control with Unigraphics.

### Windchill ProjectLink

Keep the product development team aligned through this virtual workspace.

### Windchill PDMLink

A single, trusted digital product development data repository.

### Pro/INTRALINK

Manage concurrent design teams & the power of Pro/ENGINEER data associativity.

### PTC PLM On Demand

Designed to eliminate the hurdles of upfront investment, IT resources and longer deployments.
