Windchill Workgroup Managers for:

AutoCAD

Autodesk Inventor

CATIA V4, V5

ECAD

Solidworks

USG NX

The Windchill integration to various CAD software packages combines the power of Windchill collaboration and control with the software design tool.

The ability to leverage data created during the product development process is a strategic advantage for manufacturing companies. The heterogeneous CAD capabilities of Windchill allow enterprises to capture, control, and share complex design information from different ECAD/MCAD packages within a single enterprise environment, and even within a single product structure.
