Workstations

Ad-Tech offers workstation solutions in custom configurations specific to CAD/CAM/CAE applications. The latest hardware components are tested and integrated in a range of optimized systems suitable for high end graphics users. This gives our customers choices, removes concerns about unstable integration and system performance and allows us to keep our prices competitive.

Standard

Ideal for 2D and light 3D CAD applications.

Our standard CAD workstation uses the Intel® Core™ 2 Duo desktop processor, delivering revolutionary dual-core performance and breakthrough processor energy efficiency. We combine this with the NVIDIA Quadro® FX series video processor to deliver unmatched workstation performance and quality at an affordable price.

Enhanced

For the most demanding graphics intensive applications. Our enhanced CAD workstation uses the Intel® Core™ 2 Quad Processor, the latest in cutting edge processor technology for the desktop delivering four complete execution cores within a single processor. We combine this with a higher performing NVIDIA Quadro® FX video card to provide the optimal blend of quality, precision, performance, programmability and price for all professional CAD, DCC and visualization applications.

Display Options

All workstations have LCD monitor options.

Enhance your workstation even further with the addition of a large-size LCD monitor. Sizes currently available: 30", 28", 26", 24"

3D Controller

Improve productivity by up to 30%; reduce mouse usage by over 50% with a 3D Connexion motion controller. [Learn more](#)

AMD processors are available as an option on all systems.
